### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Richard Haferkamp (reg # 29,072) on 9/15/06.

The application has been amended as follows:

Claims 51 and 72-77 have been canceled.

In claim 6, line 5, the word --by-- has been inserted after the word "conducted".

In claim 53, line 1, the word [51] has been deleted and --52-- has been inserted.

In claim 54, line 1, the word [51] has been deleted and --52-- has been inserted.

In claim 55, line 1, the word [51] has been deleted and --52-- has been inserted.

### ***Allowable Subject Matter***

Claims 1-6,8-18,20-23,52-71, and 78-82 are allowed.

The following is an examiner's statement of reasons for allowance: As claims 1,52, 56,60 and 78, the prior art does not teach bi-directional communication through the system between the repair facility and the rental company. This has previously been arranged with direct contact and thus, was cumbersome and could result in problems if not handled smoothly, the method as claimed in the instant application would be a new method of doing business. While automating a known process is not considered to be

Art Unit: 3629

patentably distinct by itself, the instant application changes the method by which the communication is achieved and thus, is considered patentable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US PAT 5,724,520 to Goheen teaches a network for rental cars but does not teach bi-directional communication between a rental agency and a repair facility, Japanese Patent #2002-74126 to Sakura, Sakura discloses using a computer network (figs 1 and 2) for making reservations for automobiles but does not teach a rental company and a repair facility as having bi-directional communication, (Note, information is taken from the Derwent English language abstract enclosed), "Travel Web site Expedia's shares take off during initial offering" by Reeves, Reeves discloses using the Internet as a method of renting cars (paragraph 3) but does not teach a rental company and a repair facility as having bi-directional communication.
